- Languages: Python, JavaScript, HTML5, CSS3, SQL (Oracle, MySQL)
- Frameworks & Tools: Django, ReactJS, Git, VS Code
- Core Concepts: REST APIs, Object-Oriented Programming, Database Design, Agile Development
- Databases: Oracle 10g/11g, MySQL

LANGUAGES

- English
- Hindi
- Kannada
- Arabic

About Me

Passionate Python Full Stack Developer with hands-on experience in building dynamic web applications using Python, Django, ReactJS, and SQL. Skilled in writing clean, efficient code and collaborating in team environments to deliver high-quality software. Strong understanding of REST APIs, database design, and front-end development. Excited to contribute to impactful projects while continuously learning and growing as a developer.

PROJECTS

Student Identity Portal
2022 – 2025

- Developed a web-based system using Python and Django to automate student ID card generation, reducing manual work by over 60%.
- Designed and implemented a role-based authentication system for secure access control.
- Built and connected a MySQL database for efficient data storage and retrieval.
- Tested, debugged, and optimized the application to enhance speed, usability, and accuracy of ID generation.

INTERNSHIP

Python Full Stack Intern – P Spider Institute, Hyderabad
Sep 2025 – Till date

- Collaborated in a team of four to develop a web portal using Django (backend) and ReactJS (frontend).
- Created and integrated REST APIs for seamless communication between frontend and backend components.
- Participated in code reviews, testing, and debugging to ensure clean and maintainable code.
- Gained hands-on experience with Git version control, database management, and application deployment.

CERTIFICATIONS

- Python Full Stack Development – P Spider Institute
- SQL for Data Analysis – Coursera
